Profile

Interdisciplinary researcher at the intersection of philosophy, artificial intelligence, and digital humanities. My work explores the ethical, epistemic, and aesthetic implications of computational systems, with a particular focus on agency and AI-mediated knowledge. I combine a strong background in philosophy with postgraduate training in Digital Humanities and Computer Science, enabling both conceptual analysis and technical implementation.

Education

Higher Diploma in Computer Science — South East Technological University, Ireland
Jan 2025 – Present | GPA: 78.6%

Relevant modules: Programming, Web Development 1 & 2, Databases, Systems & Networks, DevOps, Full-Stack Development

Final Project (in progress): AI, Education, and Digital Literary Platforms — Developing a web-based educational platform informed by frameworks from digital literature and interactive systems, analysing these frameworks to provide a philosophical grounding for the design and use of AI in learning environments. The project explores how AI mediates knowledge, shapes learning processes, and reconfigures user agency, with a focus on ethical design, epistemic access, and human–AI interaction.

MA Digital Arts & Humanities — National University of Ireland, College Cork, Ireland
2023 – 2025 | First Class Honours

Dissertation: Ethics and Aesthetics of Digital Literature — Examines how digital technologies transform literary form, arguing that electronic literature shifts aesthetics from content back to form. Analyses the ethical implications introduced by computational processes and the datafication of knowledge. Drawing on Aristotelian concepts of form and purpose, it explores how digital systems reshape literary experience while emphasising the need to preserve critical and ethical perspectives within the humanities.

MA Philosophy — Pontifical University of Salamanca, Spain
2017 – 2019 | GPA: 8.59/10

Dissertation: Ethics, Epistemology, Metaphysics, and Aesthetics in Schopenhauer's Philosophy — This work examines the dual roots of human tragedy through Schopenhauer's system, integrating epistemology, metaphysics, ethics, and aesthetics, and situates the analysis within the tradition of critical philosophy, engaging with post-Kantian reflections on the limits of knowledge and their implications for ethical thought.

BA (Hons) Humanities — Pontifical University of Salamanca, Spain
2013 – 2017 | GPA: 8.85/10

BA Philosophy — Pontifical University of Salamanca, Spain
2009 – 2013 | GPA: 8.68/10

Selected Projects

WeatherTop-IoT – Event-Driven IoT Pipeline [GitHub: edabelt/WeatherTop-iot](#) | [Live demo](#)

- Designed an **Event-Driven System** using MQTT for real-time telemetry processing and data flow handling
- Integrated messaging pipeline with Node.js backend for data ingestion and visualisation

PlaceMark – Full-Stack Web Application [GitHub: edabelt/PlaceMark](#) | [Live demo](#)

- Developed a **database-driven application** with structured backend (models, controllers, routes)
- Implemented data persistence and user interaction features using MongoDB Atlas and server-side rendering

WeatherTop – Full-Stack Web Application [GitHub: edabelt/WeatherTop](#) | [Live demo](#)

- Built a **data-driven application** with RESTful API integration and dashboards
- Processed and visualised real-time weather data using external APIs

Whether-Weather – Static Web Application [GitHub: edabelt/Whether-Weather](#) | [Live demo](#)

- Developed a **multi-page site** consuming APIs with responsive UI and clean layout

Technical Skills: Node.js, Express, Hapi, MongoDB, Mongoose, Python, MQTT, AWS, HTML, CSS, JavaScript

Professional Experience

2023 – Present

Web Developer (Freelance) — Remote

- Developed small-scale web applications and websites with responsive and user-focused UI using HTML, CSS, JavaScript, and Node.js, integrating APIs for dynamic content.

2017 – 2018

Librarian — Mariannhill Monastery, Durban, South Africa

- Digitised and organised collections, improving content accessibility and discoverability.
- Supported users and contributed to website content and information resources.

Languages

Spanish: Native

English: C1+ (Certified)

German: Intermediate B1 (Goethe Zertifikat)

Classical Languages: Reading knowledge of Greek and Latin

Volunteering

- **Transcribathon (Europeana)** — Digital heritage transcription and enrichment (2024–Present)
- **Community Support Volunteer, South Africa** — Supported children and youth in underserved communities (2017–2018)
